

MUDIT GUPTA

PHONE | (+91) 7011095499
EMAIL | muditg782005@gmail.com
LOCATION | New Delhi, INDIA

Key Skills

- Python
- C Programming Language
- C Plus Plus
- HTML And CSS Developer
- Javascript
- Chatgpt
- Github
- React

Languages

- English

Hobbies

- Playing Chess
- Watching Movies And Web Series
- Coding While Listening Music

Achievements

- Winner, CodePen Challenge at IMS Engineering College.
- Selected as Core Member of the Web Development and Aptitude Club.
- Selected to work on a project in WOC 4.0 challenge.

Profile Summary

I am a passionate software developer and problem solver, constantly exploring the intersection of technology and innovation. My journey in full-stack web development (MERN stack) and data structures & algorithms (C++ & Java) has fueled my curiosity to build scalable and impactful solutions.

Currently, I am actively working on multiple projects, including a mental health companionship platform for WOC 4.0 and MNKA, a music streaming platform. My keen interest in AI-powered development pushes me to explore modern tools like GitHub Copilot, ChatGPT, Deepseek, etc for better building which saves time.

Beyond development, I am dedicated to competitive programming and algorithmic problem-solving, continuously refining my skills through platforms like LeetCode and CodeStudio. My vision is to engineer solutions that enhance user experience and efficiency while staying adaptable to the ever-evolving tech landscape.

I believe in learning by doing, collaborating with like-minded individuals.

Education

B.Tech/B.E. - Computers

2027

IMS Engineering College, Ghaziabad

Grade - 7.8/10

Projects

JavaScript-Based Mini Projects

1 Months

- **Traffic Light Simulator** – Simulated traffic light system using JavaScript.

Extra curricular activities

- **Technical Clubs & Hackathons:**
 - Selected for Winter of Code 4.0 (WOC 4.0) to contribute to an open-source project.
 - Active core member of the Knack Club(Web Development and Aptitude Club) at IMS Engineering College.
- **Problem Solver**
Solved around 60+ problems on code 360. And continuously learning new things by each problem.

Social links

<https://muditgupta07.github.io/Portfolio/>

- **Calculator** – A functional calculator built using HTML, CSS, and JavaScript.
- **Digital Clock** – A real-time digital clock project.
- **Stone-Paper-Scissors Game** – An interactive game developed with JavaScript.
- **To-Do List** – A task management application with add/delete functionalities.
- **And many other mini projects like these are available on my github profile.**

Music Streaming Platform - 'MNKA'

2 Months

- **Description:** A full-stack music streaming platform designed for seamless audio streaming.
- **Technologies Used:**
 - Front-end: React.js, Tailwind CSS
 - Back-end: Node.js, Express.js
 - Database: MongoDB
- **Role:** Front-end development, UI/UX design, and integration with backend APIs.
